

Grocery Budget Calculator

Your Day 3 challenge is to determine how much you ACTUALLY spent on food last month, crunch the numbers using each of the three methods for determining how much you SHOULD spend on food.

Method 1: Cap your spending based on last month's numbers.	
What did you spend last month?	\$

Method 2: Calculate your budget based on the number of people in your household.	
Monthly allowance:	\$125
Multiply by the number of people in your household:	x
Total:	\$

Method 3: Reduce your spending by 10%	
Last month's spending:	\$
Deduct 10%:	-
Total:	\$

Which method works best for your family?

Is this a big stretch or easily attained? Why?
